-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Double Patenting

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 27-46 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-4,8-10,14-16,20-22 and 26 of prior U.S. Patent No. 6,683,908. This is a double patenting rejection.

The subject matter of claim 27 of the present application is identical to that of claim 1 of the above-identified patent. Although the claim languages are different, a closer look shows they cover the same scope. According to patent claim 1, the order of "Logic 1" chip samples in a slot is modified. Alternatively, the order of "Logic 0" chip samples in a slot is modified. This limitation can be interpreted as follows. Each of the "Logic 0" chip samples is shifted from its original position to a new position, resulting in a modified order of the "Logic 0" chip samples. Likewise, each of the "Logic 1" chip samples is shifted from one position to another, resulting in a modified order of the "Logic 1" chip samples. Application claim recites shifting positions of samples, corresponding to Logic 0 samples, from a first position to a second position or shifting positions of samples, corresponding to Logic 1 samples, from a first position to a second

position. Simply put, the order of the chip samples is modified in the same way as the patent claim requires as explained above.

For the same reason, claims 33, 37,41 are considered as identical to patent claims 9,15,21 respectively.

Claims 28-32,34-36,38-40,42-46 correspond in scope to patent claims 2-4,8,10,14,16,20,22,26.
